

A púposzúnyogok (Diptera: Simuliidae) hazai fajainak névjegyzéke
Provisional checklist of the Hungarian blackflies (Diptera: Simuliidae)

Compiled by

CSABA DEÁK

Version 2009.04.20.

A lista DEÁK & MÓRA (2009), ADLER és CROSSKEY (2008), CROSSKEY és HOWARD (2004), JEDLIČKA *et al.* (2004), PAPP (2001) munkái alapján készült. Jelenleg Magyarországon 25 faj jelenlétéről van tudomásunk (félkövérrel), a várható fajok (szögletes zárójel) száma kb. 25 és 30 között várható.

The list of species was prepared by using the studies of DEÁK & MÓRA (2009), ADLER and CROSSKEY (2008), CROSSKEY and HOWARD (2004), JEDLIČKA *et al.* (2004), PAPP (2001).

At the present the Hungarian blackfly fauna contains **25** (morpho)species (indicated by bold letters in the list), whilst the number of the expected species (in square bracket) is between 25 and 30.
